
Maven Market – Analysis

❖ Key Insights & Recommendations: -

Key Insights

- **Maven Market shows strong overall performance with a high profit margin of about 59.67%.**
- **Monthly revenue is gradually declining, despite strong profitability.**
- **The United States is the primary market for both revenue and profit.**
- **Canada and Mexico contribute less to total performance and still offer growth potential.**
- **Store distribution is heavily concentrated in the United States (~54%, 13 stores), followed by Canada (~37%, 9 stores), while Mexico has a limited store presence (~8%, 2 stores).**
- **A large share of revenue comes from a small number of regions and stores.**
- **A limited number of brands and products generate most of the total sales.**
- **The overall return rate is low (around 1%).**
- **A relatively small group of customers generates a large portion of total revenue.**

Recommendations

- **Run targeted promotions during months with declining sales.**
- **Continue focusing on the US market, as it is the main source of revenue and profit.**
- **Increase marketing efforts in Canada and Mexico to capture growth opportunities.**
- **Improve performance in underperforming regions and stores by reviewing operations.**
- **Focus more on high-margin products.**
- **Review products with high return rates to address quality or handling issues.**
- **Provide targeted offers and discounts to existing customers and high-purchase customers to increase loyalty and repeat purchases.**
